Sofiene ZAYATI

Embedded Systems Graduate & Web Technologies Engineering Student

Engineering student passionate about fusing hardware and software into intelligent systems. Grounded in embedded programming with strong full-stack skills, I build end-to-end solutions applying AI/ML to smarter IoT devices and data-driven web platforms.

Education

Engineering Degree in Web and Internet Technologies TWIN

Since September 2024

ESPRIT : Ecole Sup Privée d'Ingénierie et de Technologies Ariana Governorate, Tunisia

Bachelor's Degree in Embedded and Mobile Systems

From September 2021 to June 2024 Higher Institute of Technological Studies of Rades Radis, BA, Tunisia

Baccalaureate in Technical Sciences

From September 2017 to June 2021 Lycée Technique Farhat Hached Rades Radis, BA, Tunisia

Work experience

AI Automation & Full Stack Developer

From July 2025 to August 2025 Inspark Connect Tunis, Tunisia

Development of AI-powered workflows and intelligent assistants for the Prigado e-commerce platform.

Internship Embedded Systems & Software Developer

From February 2024 to May 2024 Scheidt & Bachmann Megrine

Creation of Smart Parking using LPR and mobile app access MacroPark.

Internship Hardware & Software Project Manager

From January 2023 to February 2023 Scheidt & Bachmann Megrine

Creation of Smart Lock for the Company.

Internship Web Development

From January 2022 to February 2022 Sotunol Megrine

Developed and improved the company's web platform.

Projects

SmartProperty - AI-Powered Real Estate Platform

- Developed a full-stack real estate platform with AI-powered property recommendation, pricing prediction, and AI assistants.
- Built a scalable architecture using React, NestJS, FastAPI microservices, MongoDB, and WebSockets.
- Integrated machine learning models, LLM-based assistants, voice intent routing, and analytics dashboards.
- Deployed scalable services using Docker, Kubernetes, and Jenkins CI/CD pipelines.

Tech Stack: React, NestJS, FastAPI, MongoDB, PyTorch, XGBoost, Docker, Kubernetes, Jenkins, WebSockets

Prigado AI - Intelligent E-Commerce Automation

- Developed AI-powered workflow automation for the Prigado e-commerce platform using n8n, Laravel, Vue.js, MySQL, and Gemini.
- Built conversational AI assistants for product enrichment, sales analytics, marketing automation, and logistics prediction.
- Designed AI Router workflows with intent extraction, JSON sanitization, SQL aggregation, and automated email campaigns.

Tech Stack: n8n, Laravel, Vue.js, MySQL, Gemini, SMTP, REST APIs

InnoMall - Integrated Mall Management System

- Developed a full-stack mall management platform (JavaFX desktop + Symfony web) for admins, shop owners, and clients.
- Built an IoT multi-floor parking system with real-time sensor tracking, live spot monitoring, and online reservations.
- Integrated Stripe payments, AI-powered chatbot, analytics dashboards.

Tech Stack: Symfony 6, Java, JavaFX, MySQL, Stripe API, Gemini API, Twilio, IoT Sensors

MacroPark - Smart Parking System

- Developed a multi-component smart parking ecosystem including admin platform, mobile application, IoT barrier controllers, and license plate recognition integration.
- Built WT32-based barrier controllers using MQTT, BLE, Ethernet/WiFi failover, OTA firmware updates, and real-time access management.
- Integrated LPR camera systems, REST APIs, Dockerized backend services, and real-time event monitoring for automated parking management.

Tech Stack: C++, Python FastAPI, MQTT, BLE, Docker, Flutter, REST APIs, WT32-ETH01, LPR

ZenithHouse - Smart Home Control System

- Developed a smart home automation system for climate, lighting, and access control using ESP32 and Firebase.
- Built a mobile-controlled real-time synchronization system for connected devices.

Tech Stack: C++, Firebase, ESP32
